WORK EXPERIENCE

Simply Vyapar

June 2023 – Present

Software Engineer II

- Bootstrapped and owned **Flyy** (WhatsApp Marketing Platform) from scratch, developing core **React** features across Web, Windows, macOS, and Android (WebView) using **RSPack**, onboarding **15K+** new users monthly.
- Developed an AI-powered poster generation feature in Flyy using **Next.js** and **Server-Sent Events (SSE)** for real-time updates and an independent Razorpay payment integration.
- Designed and enforced production-grade REST APIs using **NestJS**, integrating end-to-end license purchase and renewal flows with Razorpay, ensuring secure payment processing.
- Engineered a Jenkins-based CI/CD pipeline triggering deployments from GitLab, pushing frontend artifacts to **AWS S3** and distributing releases via **CloudFront** for faster production rollouts.
- Implemented an in-app auto-update mechanism that checks S3 for new versions and hot-swaps resources via worker threads, reducing manual build creation across Windows and macOS from **1 day to under 5 minutes**.
- Led system design and development of **Vyapar Network**, an invoice-sharing solution between Vyapar-connected users, eliminating reliance on external channels and supporting real-time tracking for **25K+ invoices/month**.
- Delivered fault-tolerant **POS** modules (inventory, checkout, EDC payments) for a retail system used by **50K+ merchants**, ensuring mobile responsiveness and production reliability.
- Achieved a **4.7%** referral conversion rate in the initial launch by implementing a user referral system, boosting organic user growth.

Simply Vyapar

Jan 2023 – June 2023

Software Engineer Intern

- Introduced scalable dashboards using React and Chart.js to convert raw sales data into actionable business insights for **10K+ users**, covering online store reports and sales analytics.
- Delivered a user-centric onboarding flow for Vyapar's Loyalty feature, improving usability and driving feature adoption.
- Established relationships between sale orders, sales, and delivery challans using **SQLite**, improving data management efficiency through advanced SQL queries.
- Created reusable UI components using **TypeScript**, Material UI, and documented them via **Storybook** for cross-team reuse.
- Redesigned the login experience using modern UI patterns, improving completion rates and user satisfaction.

PROJECTS

Sketch Board

GitHub

JavaScript, Node.js, Express, Socket.IO, Canvas API

- Developed a real-time collaborative whiteboard with live multi-user sync via **Socket.IO**, supporting pencil, eraser, color picker, and sticky text notes.
- Executed smooth drawing interactions with undo/redo functionality and board export as an image.

Hacker News Scraper

GitHub

TypeScript, Node.js, Puppeteer, MySQL, WebSocket, Express

- Built a service that scrapes Hacker News at scheduled intervals, stores deduplicated stories in **MySQL**, and streams live updates to connected clients via **WebSockets**.
- Exposed a REST API for historical data retrieval with a lightweight HTML client for live visualization.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, C, C++, SQL
- **Frontend:** ReactJS, Next.js, Redux Toolkit, Electron, Tailwind CSS, Material UI, HTML, CSS
- **Backend & Databases:** Node.js, NestJS, MySQL, MongoDB, SQLite
- **Tools:** RSPack, Vite, Webpack, Jest, Docker, Git, Jenkins, AWS (S3, CloudFront, EC2), Sentry, Mixpanel

EDUCATION

PES University

Aug 2019 – May 2023

Bachelor of Technology – Computer Science and Engineering

CGPA: 8.71

ACHIEVEMENTS

- **Won 1st Place** at Vyapar Hackathon (2023) by building an AI-powered inventory management solution.
- Awarded the **MRD Scholarship** for ranking in the top 5% of the B.Tech batch at PES University.
- Published a conference paper titled "*Personalized Film Discovery Service*" at **Springer ICAIS**, focusing on hybrid ML-based recommendation systems.
